Business & IT Meeting Analysis - Lead Management & Automation Issues

Executive Summary

The meeting focused on critical issues within the lead management and automation systems for a franchise operation. Key problems include fragmented lead creation processes, manual interventions, system integration failures, and capacity management issues across multiple platforms.

Current System Overview

Tech Stack Components / Componentes da Stack Tecnológica

- **CRM**: Zoho
- **Trial Booking**: Simply Book Me
- **Enrollment System**: iClass Pro
- **Communication**: RingCentral
- **Automation**: Zapier
- **Additional Tools**: Twilio, Finch Media

Critical Issues Identified

1. Lead Creation Problems / Problemas de Criação de Leads

- Automation error: System cannot find lead entries and creates duplicates in Zoho
- Multiple entry points on website (5 different forms) create confusion and data inconsistency
- Leads can be created through different pathways, causing fragmentation
- Manual updates required weekly (typically Fridays) by franchise owners

2. System Integration Issues

- iClass Pro and Simply Book Me don't communicate with each other
- Both systems book the same time slots without coordination
- Coach scheduling happens on a third system, creating triple-booking risks
- Legacy versions of Zoho and RingCentral apps causing automation failures

3. Capacity Management Problems

- Risk of overbooking or underbooking classes
- Franchise owners manually implement "airline overbooking" strategies
- Manual approval required for trial classes (not standard)
- No automated coordination between enrollment and trial booking systems

4. Follow-up Process Issues

- Semi-manual, semi-automated process creates inefficiencies
- Lead source tracking is overridden by automation
- No workflow for cancelled trial classes
- Manual conversion from leads to contacts required
- Inconsistent follow-up templates and timing

Immediate Action Items

Quick Wins

1. **Fix Automation Errors**: Address duplicate creation issues in Zapier workflows
2. **Update Legacy Apps**: Upgrade Zoho and RingCentral to current versions
3. **Create Missing Workflows**: Build automation for cancelled trial classes
4. **Standardize Forms**: Reduce website forms from 5 to 1 unified lead capture form

Red Flags to Address Now

- Phone call automation success rate below 90% for some processes
- Manual capacity management leading to potential service disruptions
- Data integrity issues with lead source tracking
- Risk of lost leads due to system disconnects

Strategic Recommendations

Short-term (3 months)

1. **Unify Lead Funnel**: Force all leads through single standardized process
2. **Consolidate Booking Systems**: Integrate or replace Simply Book Me and iClass Pro
3. **Standardize Follow-up**: Create clear automated vs. manual follow-up paths
4. **Improve Data Tracking**: Preserve lead source information throughout process

Medium-term (6-12 months)

1. **Tech Stack Simplification**: Evaluate redundancies and eliminate unnecessary tools
2. **Full System Integration**: Ensure all platforms communicate effectively
3. **Automated Capacity Management**: Implement intelligent scheduling coordination
4. **Comprehensive Reporting**: Build unified dashboard for all franchise metrics

---

Platform Evaluation

Keep

- **Zoho CRM**: Flexible and proven, already researched for Tutor Doctor
- **Zapier**: Good for workflow automation (needs updates)

Evaluate for Consolidation

- **Simply Book Me vs iClass Pro**: High redundancy, integration issues
- **Twilio vs Finch Media**: Need clarity on functionality overlap
- **RingCentral**: Evaluate against other communication platforms

Requirements for New Solutions / Requisitos para Novas Soluções

- Native Zoho integration
- Strong API documentation
- Capacity management coordination
- Payment processing capabilities
- Real-time scheduling synchronization

Success Metrics

- Automation success rate >95%
- Lead conversion tracking accuracy >98%
- Reduction in manual franchise owner tasks by 70%
- Elimination of double-booking incidents
- Improved lead response time by 50%

Next Steps

1. **Immediate**: Fix critical automation errors and update legacy systems
2. **Week 1-2**: Implement unified lead capture form
3. **Month 1**: Complete workflow analysis and create missing automations
4. **Month 2-3**: Begin platform consolidation research and planning
5. **Ongoing**: Regular monitoring and optimization of success metrics

---

Conclusion

The current system suffers from fragmentation and manual intervention requirements that create inefficiencies and risk service quality. A phased approach focusing on immediate fixes, followed by strategic consolidation, will create a more robust and scalable operation.
