Workflows in Zoho

Manual Trigger - Task/Status Automation workflow

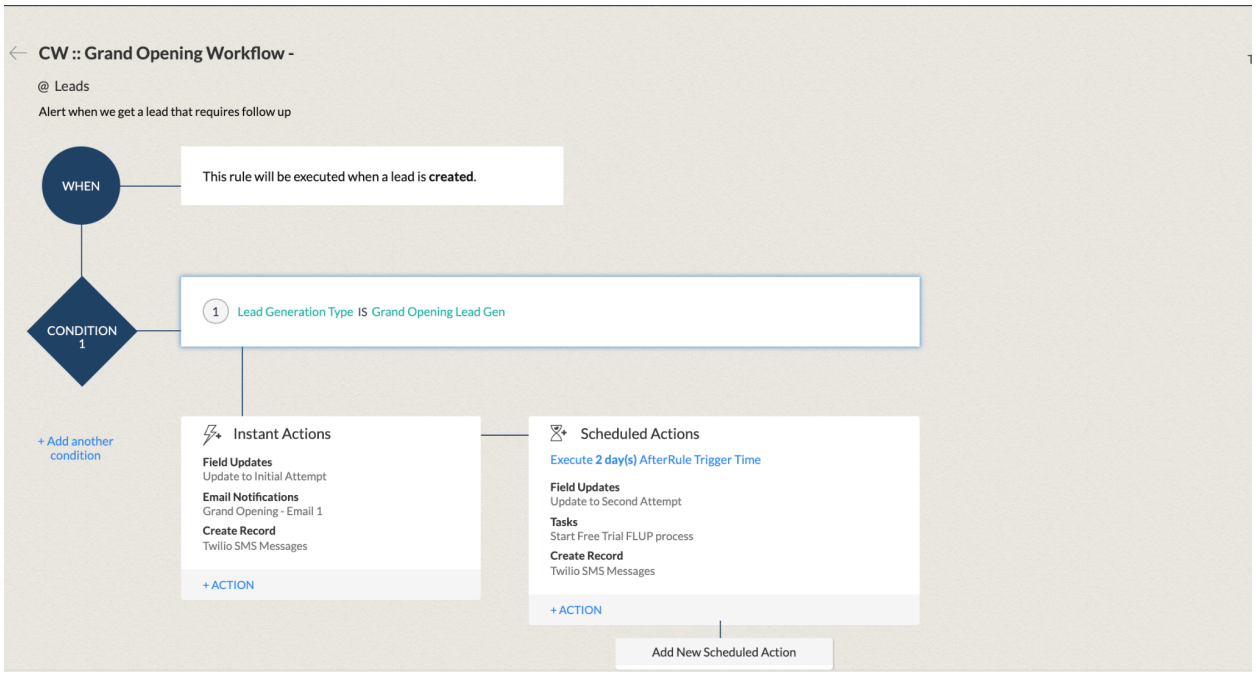

This workflow is triggered when the Lead Status field is updated and changed to 1st, 2nd, 3rd, 4th or 5th FLUP. This then triggers the Lead Status FLUP task due dates

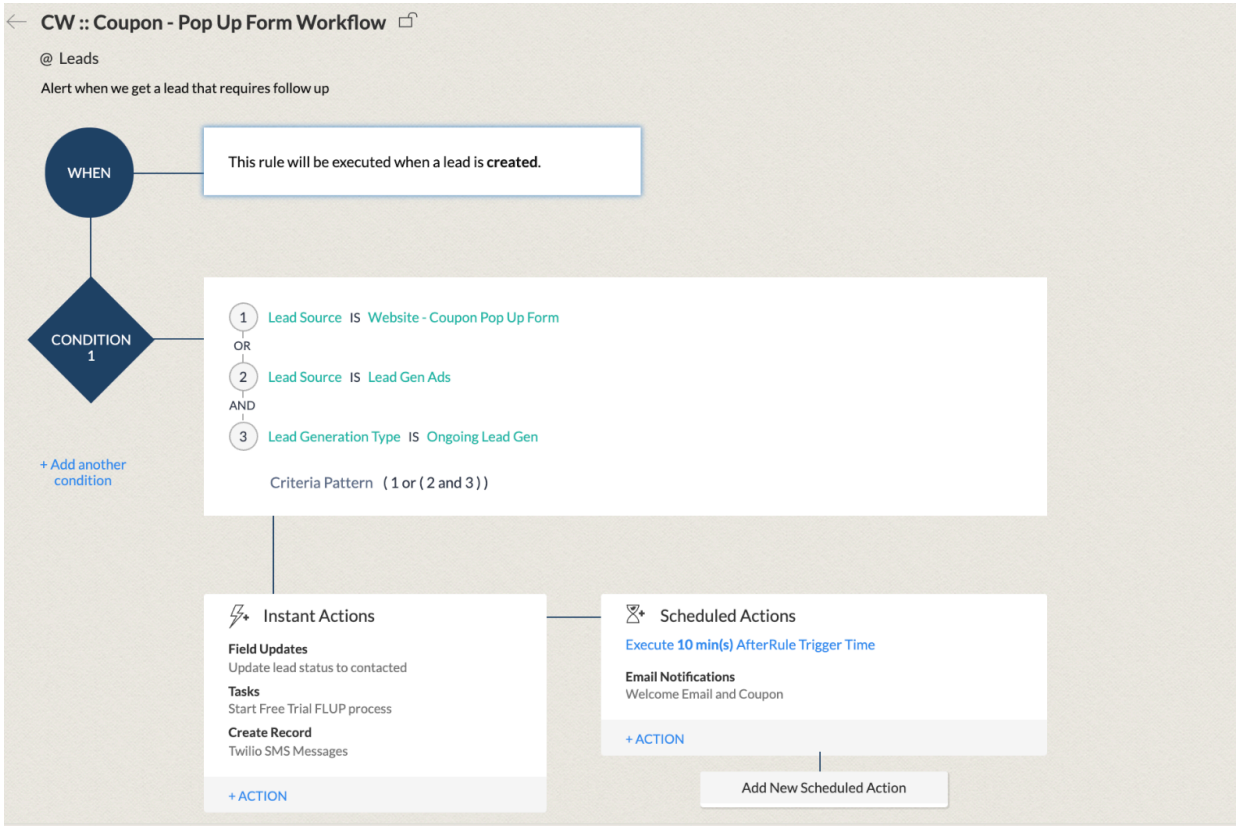

Grand Opening Workflow

This workflow is triggered when a lead fills out a grand opening form either on the website or through Facebook ads. Once the lead comes in, they receive a text and an email instantly. Two days later, they receive a follow text if they didn't respond and a task to start the free trial FLUP process is created.

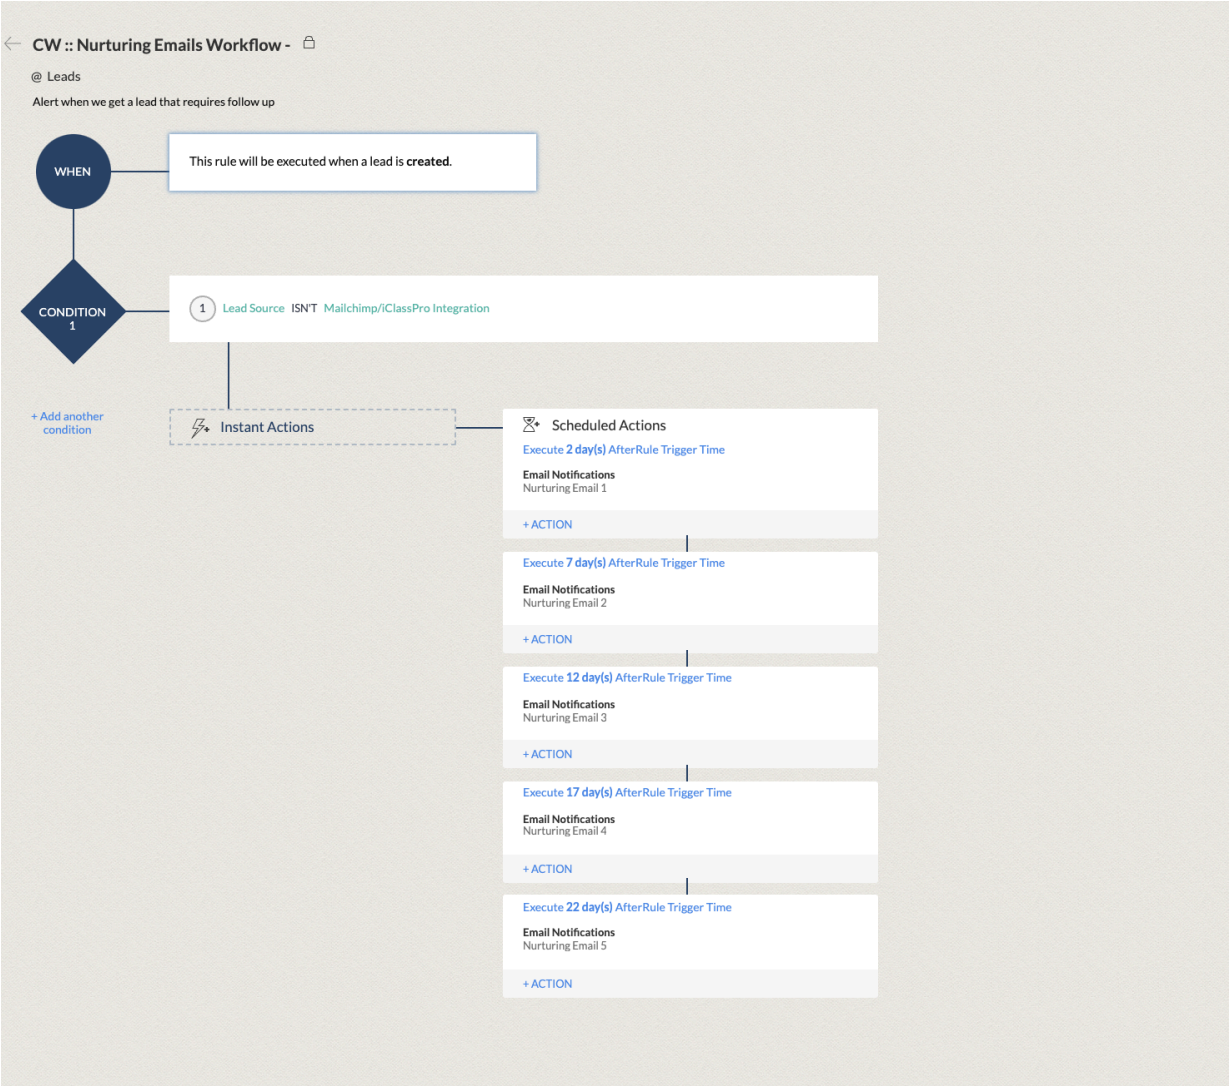

5% Off Coupon Workflow

This workflow is triggered when the lead magnet pop up form on the website is filled out. The lead gets an initial text, a task is created to start the Free Trial FLUP process and 10 minutes later, an email with the coupon code is sent.

Nurturing Emails Workflow

This workflow is sent to any new lead that comes in to zoho. They are a series of emails sent over three weeks explaining the benefits of coding and why Code Wiz is the go-to expert on coding for kids.

Trial Class Booked Workflow

This workflow is triggered when a trial class date is modified, the status is updated to “Trial Class Booked” and a task to FLUP with Trial Class is created
