Zoho CRM Setup Challenges and Optimizations

This document outlines the setup challenges faced in Zoho CRM that lead to data discrepancies and provides suggestions for optimizations to improve data accuracy and reliability.

Summary Points

Challenges / Optimization	Why?	Suggestions
Trial Class Tracking / Analysis	Discrepancies in Analysis. Performance Key Metric	Do not update “Lead Source” Standardize fields to track Historical Tracking
Lead Source Standardizing & Reporting	Too many lead sources, leading to poor tracking and inaccurate data.	Clean Up Standardize
Phone Call Leads Tracking / Automations	Enhance Lead FLUP and tracking	Automate / Integrate Phone tools to Zoho to track all leads Automated Workflow FLUPs and consistency
Enrollment / Contacts	Discrepancies. Key Metric	Work close to locations for tracking and standardization. Break into smaller actions as a team
Workflows and Automations Mapping	Disorganized automations. Lack of ownership.	Documentation.

1. Trial Class Tracking / Analysis (Lead Source changes)

Issue: When a trial class is booked, the lead source custom field is updated, causing loss of the original conversion source.

Discrepancies between lead to trial conversion rate in Zoho vs. scorecard:

- Zoho Facebook Lead Gen “Lead To Trial” conversion is 1.3%.

	T Lead Source	# Total Leads	# Leads Booked Trial	.# Trial Booked/Total
1	Facebook Lead Gen	1512	20	0.013227513227513227

This happens because the lead source gets changed to “Trial Class” and doesn't count it as a FB lead anymore.

Note: Analyzing this year for accurate comparison with the Facebook Ads (Snaps 08/08/2024).

- In the scorecard the “Lead to Trial” to conversion rate is 9.16%

ALL	TOTAL
Total Leads	1812
Trials Booked	166
Lead to Trial (%)	**9.16%**
Enrollments	39
Total LTV ($)	$13,638.72
Trial to Enrollment (%)	23.49%

Optimization:

- **Do not change the lead source** when a lead books a trial. **Suggestion**: Just update the lead status.
    - Workflow example: When there is a new booking in SimpleBookMe, check for a match in the CRM using the booking information.
        - If no match is found, create a new record and add the **Lead Source** “Trial Class”.
        - If a match is found, update the “**Lead Status**” only to Trial Class Booked. **DO NOT** change the lead source.

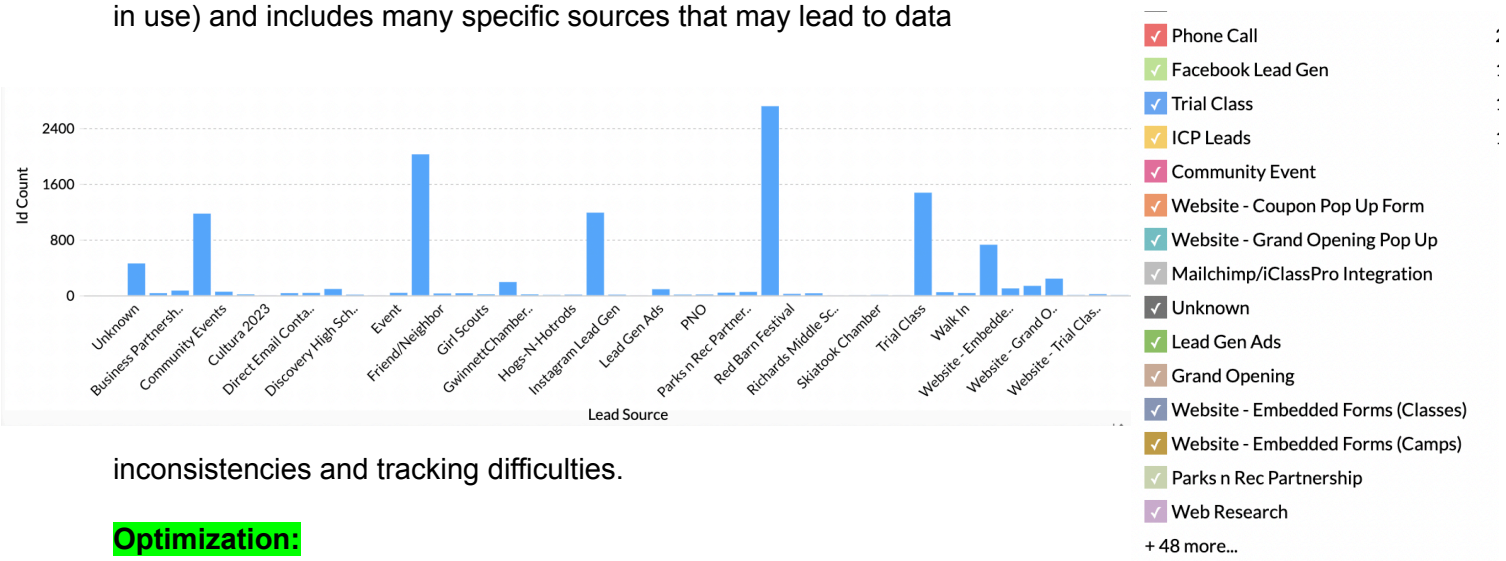

- **Standardize how to track trials in Zoho, with what property? Agreement & Documentation.**
    - These zap update the field Trial Class Date when there’s a new booking
    - Check if this is the accurate field to track. Can it change? If so Should we create another property?
- **Historical tracking:** Lead Source History. As for now, when a lead converts in Facebook and then in Website – now we are just counting the last source it converted into. So the trial in Zoho is counting for the Website source. → Define what and how we want to track.

Short Term Implementation: This will help track the performance of the Road Show event coming in Sept. Making sure we can accurately track trial conversion from the Community Signs.

---

2. Clean Up and Standardizing Lead Sources

Issue: Current list of lead sources in Zoho CRM is extensive (with many not in use) and includes many specific sources that may lead to data

inconsistencies and tracking difficulties.

Optimization:

- Clearly **define** and separate lead sources vs statuses.
- **Standardize Lead Sources:** Group specific sources under broader categories to reduce the number of lead sources. Ensure each lead source name is clear

Please look at the level of lead source categorization in order to improve clarity and relevance of information.

Keep the sources under the "Lead Source" column. Add tags / new fields for more specific tracking.

Proposal: Website Forms, Paid Social Media, Direct Contact, Community Events, Partnership, Trial Class, Referral, Phone Call, ICP, Walk In, Gift Purchases

Channel	Lead Source	Campaign/Specifics
Digital	Website Forms	Coupon Pop Up Form
		Embedded Forms (Camps)
		Embedded Forms (Classes)
		Grand Opening Pop Up
		Information Packet Form
		Trial Class Form
	Paid Social Media	Facebook Lead Gen
		Instagram Lead Gen
	Direct Contact	Direct Email Contact
		Direct Signup

Community	Community Event	Community Sign
		Grand Opening
		Hogs-N-Hotrods
		Redbud Events
		Skiatook Chamber
		SPOT the Hotrod
		PNO
	Partnerships	Business Partnership
		Parks n Rec Partnership
Trial	Trial Class	
Enrollments	ICP Leads	
Referral	Referral	Friend/Neighbor
		Employee Referral
		Session Families
		Staff
		Girl Scouts
Offline	Phone Call	
	Walk In	
Special	Gift Purchases	

Click on the table above to access the sheet and see comments / questions.

Note: Make sure we are not losing the source when converted to contacts.

Short Term Implementation:

- **Milestone**: All Sources Report tracking. Accurate source of truth. Benchmark.
- Decide which lead source is the appropriate one for the upcoming marketing projects.

---

3. Phone Calls /Community Events leads tracking

Issue: Lack of tracking in the CRM and therefore, FLUP process. No accurate tracking for decision making.

Optimization: Address with new Community Event in Sept

- Add all leads to the CRM **automatically**, including missed calls. Integrate Call Tracking Tool to Zoho.
- Create workflows to automatically FLUP with missed calls

- Consistency in manual FLUP after calls (sending Trial Class link) and nurturing leads to get them to book a trial.
- Tracking & Analysis. Need the proper set up in Zoho (Lead source defined & Status)

Future Integrations: Add click to call feature to seamlessly integrate with CRM to increase tracking ability of outbound calls.

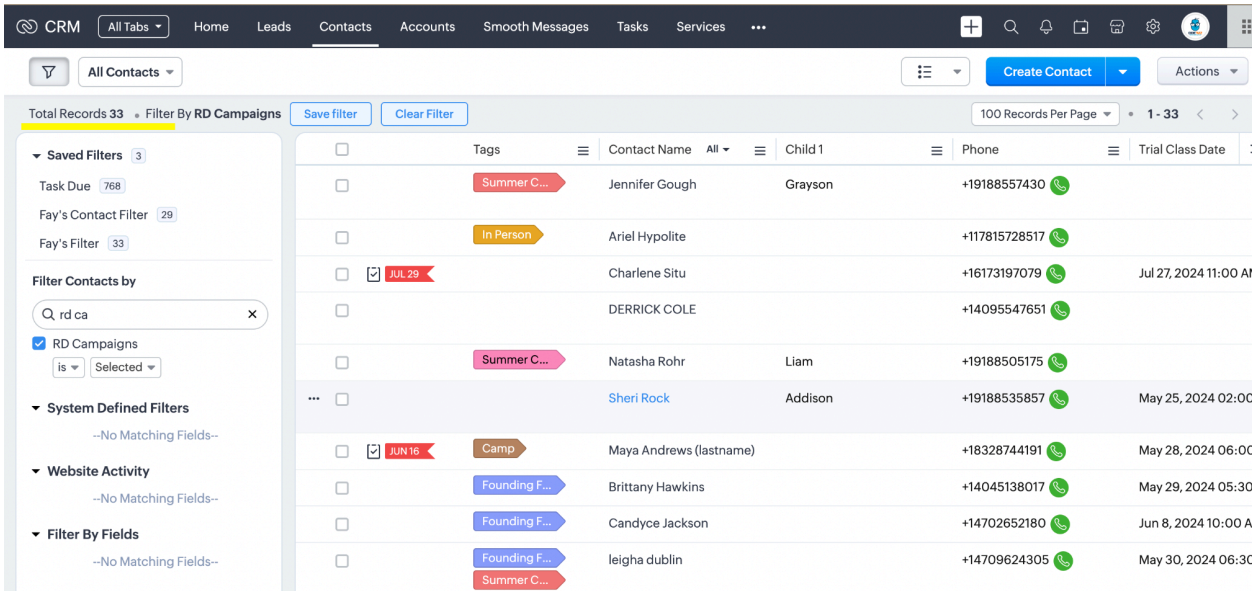

---

4. Enrollments / Contacts Tracking

Issue:

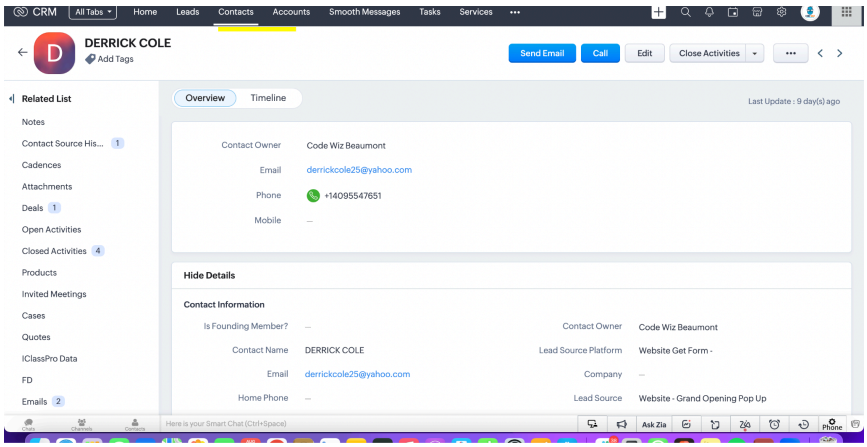

- Lost fields when converted to contact. Make sure to decide / test which standard fields we want to carry over to the contacts module.
    - **Example**: Hingham Tag lost. Lead source history lost.
- Discrepancies between Enrollments based on ICP and Zoho and therefore, inaccurate data. For Facebook Ads we have 39 enrollments (based on ICP reports matching). In Zoho, only 33 are under the Facebook Lead Gen for our campaigns.

ALL	TOTAL
Total Leads	1812
Trials Booked	166
Lead to Trial (%)	**9.16%**
Enrollments	39
Total LTV ($)	$13,638.72
Trial to Enrollment (%)	23.49%

Discrepancies due to manually converting leads. Examples:

- Mom converted on Facebook, franchisee talks to them, converts them and then Dad enrolls in ICP. → Double counting
- Contacts in Zoho, but not in ICP. Understand manual changes.
    - Contact in Zoho with no payment/ enrollment in ICP

- No updates in Zoho. This Facebook lead is enrolled in parents night (ICP 05/10/2024). No reflection of this in the CRM.

Recommendation:

- Standardize process and training while working close to some locations.
- Integrations / Automations to avoid manual errors.
- Breakdown as a team

---

5. Streamlining Workflows/ Automations Documentation

Issue: Currently, the workflows and automations in both Zoho and Zapier are scattered and disorganized, with no clear mapping or ownership. This lack of structure makes it difficult to track what leads are receiving or missing, leading to potential over-communication or gaps in follow-up

Optimization:

- Mapping out all existing workflows and automations, clearly defining roles and responsibilities for managing and updating these processes.
    - **Example**: Facebook Leads Mapping. Includes entire lead journey, all follow-up (FLUP) instances with corresponding tasks/automations in Zoho and Zapier, and

links to those processes to know where to make changes. Also the roles/owner of each step.

By doing so, we can ensure that our lead nurturing efforts are aligned, avoid overwhelming leads with redundant communications, and adjust our strategies to fit within our follow-up (FLUP) plans effectively.

Implementation: Crucial for upcoming rocks, as it will help us identify and refine the marketing formula model, allowing us to standardize the process across all channels. This clarity and consistency will not only improve our internal operations but also enhance our ability to communicate effectively with franchisees, and for franchise development.

- **Example**: Automated Workflow Guidelines and Facebook Ads Set up for future implementation.

Other Suggestions

a. **Trial Class Show Rate Tracking**

Short Term Implementation: To finish off our hypothesis about GO performance of FB Ads, to be ready to model and roll out this channel in the future for all franchisees. We need to know if it is worth having leads to book trials many months in advance, or if the objective is brand awareness and exposure of a new location, align financial return expectations accordingly.

b. **Zip Code Tracking for all leads from all channels in Zoho**
